Aleksandar Sušić

Solunskih junaka 24,
Milici 75446, BiH,RS

Date of Birth:
05.12.1987.

LinkedIn profile
Portfolio-blog

I am a devoted it engineer with ~15 years of experience in the system and network administering. I pride myself on the ability to balance between security and business policy while honoring deadlines and business requirements. While I can work fully independently, I enjoy collaborating and discussing with colleagues about news and new practices. I am eager for new challenges and sharing knowledge with great people!

Key Skills

- Excellent knowledge of operating systems (Windows, Linux, UNIX)
- Excellent knowledge of Windows Server 2008, 2012, 2016, 2019 (Active Directory, RDP, Group Policy, DHCP, working with RAIDs, ...) aslo Linux servers like Ubuntu and CentOS.
- Linux services automation using bash scripting and configuring Ansible for installations and update multiple hosts. Working with VPN like Swan, Ipsec, OpenVPN to secure connections between hosts.
- Mail server administration (MDeamon, Microsoft Exchange) as well as administration and creation of a Linux-based Mail server (Postfix, Dovecot, SpamAssasin, ISPconfig 3, RoundCube) ...
- Working with virtual machines - VirtualBox and VMware (ESXi, vSphere, vCenter), Completing AZ-104-Microsoft Azure Administrator (by Lanaco).
- Implementation, Configuration and maintaining a surveillance system. Working with Dahua, Hikvision, AXIS, AcTi (configuring server and a lot of DVR/NVR, PTZ cameras and organizing user permissions).
- Implementing local linux based web server with ISPconfig 3, aslo working with cPanel and Parallax. Dockerizing wordpress webisites and have good knowledge of php (Freelance working with Wordpress CMS and Laravel framework).
- Excellent knowledge of Cisco infrastructure, maintenance and management of LAN, WAN, NOC. Administration of Cisco ASA Firewall. Management of VPN accounts, work with remote access programs...
- Configuring Cisco Switches and Routers (having a certificate of successfully completed CCNA Routing and Switching training, 6 months program), virtualization of CISCO vWLC controllers.
- Many years of experience in data recovery working with CloneZilla, Acronis, EaseUS Data Recovery, rsynce.

Education

2006 – 2012 University of Novi Sad "Mihajlo Pupin" Tehnical fakulty, Zrenjanin - Master in Information Technology (300 EPSB)

Biography

I have been working with computers since 2001. In high school, I primarily focused on design and operating systems (Win98, WinME, WinXP). After I went to college in 2006, I worked as a freelancer on the 99designs.com. Upon completing my studies, I started working as a system administrator.

Initially, I maintained a small network with about 30 computers, gaining basic knowledge of network and system administration. After four years, I moved to Bauxite Company, where I currently work as a system administrator and software designer. I am responsible for administering and monitoring more than 350 devices, primarily computers (~250) running the Debian-based Linux OS. The company covers an area of about 30 km^2, with branches throughout Bosnia and Herzegovina, resulting in a complex network infrastructure.

As an administrator in the company, I manage accounts and permissions, work on the implementation, setup, and maintenance of Linux/Windows servers, as well as the setup and maintenance of every host in the network. I engage in remote administration of Linux/Windows systems and lead projects related to network reconstruction and surveillance system implementation.

I have implemented network and device monitoring systems, utilizing tools such as LibreNMS, Pi-Hole, Zabbix, Ansible, Cisco Umbrella. I also work with VMware tools for virtualizing several servers, mostly standalone, for various purposes. To maintain a healthy network and ensure user satisfaction, I use a variety of tools and software. I stay updated with technology by attending numerous seminars and participating in continuous education. In recent years, I obtained Cisco CCNA Routing and Switching and AZ-104 Microsoft Azure Administrator certifications. You can visit my website to explore some of my hobbies as a freelancer.

Employment History

Bauxite Company (from 2016.)

- System administrator and software designer

AD "Komunalno" Milići (2012 – 2016.)

- System and Network administrator

Birooprema doo Zrenjanin (2011 – 2011.)

- System and Network administrator
